SPECIFICATION OF NOPTAM 300EZ

Pre-addition type Defoamer for Bioethanol production process.

Product	: NOPTAM 300EZ
Type	: Polyether
Defoaming ability	: Good
Storage stability	: No phase separation
Water dilution requirement	: Not required (use undiluted)
Application method	: NOPTAM 300EZ is a pre-addition defoamer mainly used to maintain low foam levels.

Typical Properties :

Appearance	: Colourless liquid
Viscosity	: 520 mPa•s (25°C)
Solubility in water	: Water dispersible

Features :

- Excellent defoamability
- Prevents the troubles caused by foam.
- Improves the productivity by utilizing the dead volume occupied by foam.
- Reduces the used amount of Defoamer compared with conventional
- Defoamer does not inhibit the Ethanol fermentation.
- Only one time addition required.

Application :

Fermentation (Bioethanol)

Packaging :

Drums : 210 kgs
